Re

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6 and 28-30, drawn to a method of preserving a perishable product placed in a container, classified in class 426, subclass 243.
- II. Claims 7-27, drawn to a preservation device, classified in class 99, subclass 467.

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case preservation device can be used to cover any item, perishable or non-perishable and edible or inedible.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

The examiner notes that wording of the specification and the claims are unclear and confusing. It is not clear as to how exactly the tabs function or the preservation device is used. It is not seen how the tabs are inserted into the casing. Also, it is not known what the dotted lines in figures 3-8 represent. Further, evacuation of fluid is

compressing step. In the interest of expediting prosecution, it is strongly suggested to review the specifications and claims to clearly define the claimed invention.
